of Mobius Executive Leadership

Annual Summer Immersion

June 5th evening to June 10th afternoon, 2016

Boston, Massachusetts

NEXT PRACTICE INSTITUTE

The Next Practice Institute (NPI) of Mobius Executive Leadership sponsors transformational training programs for our practitioners, partners, and clients. These programs operate at the nexus of “best practice” in such areas as organizational development, culture change, and adaptive leadership, and “next practice” in neuroscience, somatics, energy work, music, yoga, and other expressive/devotional arts.

Together we are creating a global community of practice devoted to the craft of transforming people into stronger leaders and building a better world for everyone.

Each summer we conduct a week-long professional development immersion outside of Boston. This Summer Immersion brings together business leaders, human resources and organizational development professionals, strategy and search consultants, and practitioners, including coaches, mediators, interventionists, and facilitators. We come together for renewal, learning, inspiration, and practice.

The Summer Immersion is supplemented all year long by webinars, weekend workshops, and an active practitioner portal to which we all contribute.

SUMMER IMMERSION | PROGRAM TRACKS

Participants in the 2015 Immersion can select from one of three tracks for the week.

Each session will be limited to approximately 25-30 group members.

When registering, please select both a first and a second choice, and we will make every effort to accommodate your selection.

Track One: Art of Transformational Consulting with Robert Gass

Robert Gass, a leading authority in large-scale culture change, will share his Wheel of Change model as a frame for understanding the critical levers for consulting complex systems that are in the process of organizational transformation. This training will help consultants to understand and weave this transformative approach into their consulting practices with clients and to better understand their own roles in the transformational process as instruments of that change.

Track Two: Advanced Coaching and Somatics Training with Jennifer Cohen

We will dive into the latest information from Neuroscience and Somatics to support you in gaining a grounded understanding of what makes working with and through the body so powerful in effecting long-lasting, sustainable change. An understanding of how the human structure actually shapes our behavior is of great influence when leading others, and a renewed commitment to your own practices as a gateway to a coaching presence begins to create a field in which clients shift. Be ready to use yourself and your habits as an access to your learning.

Track Three: Team Coaching with Alexander Caillet

Becoming a masterful team coach requires the skills and ability to make real-time interventions within the team while it does real work. Team coaches who take this track will learn the team and human dynamics models they need to make clear observations and execute powerful interventions that can help teams improve their effectiveness, cohesion and performance.

MYSTICAL PRINCIPLES OF TRANSFORMATION

A special group session with Thomas Huebl

Wednesday afternoon and evening

We are honored to announce that this year's program will include an opportunity to study together the mystical principles of transformation with non-dual teacher Thomas Huebl, who will join NPI by videoconference from Berlin.

Thomas is blazing a path of 21st-century spiritual practice and helping thousands of students around the world to really live their awakening amid today's busy world.

He will lead the full group in an afternoon and evening of study, practice, and awakening. Thomas will share his unique approach for living as a mystic in the marketplace, sharing his understanding of the mystical principles of embodiment, healing, manifestation, and service. We are truly delighted to offer this opportunity to practice with an advanced teacher who understands the challenges of modern life and is versant in psychology, philosophy, and meta-physical awareness.

Thomas Huebl is a rare guide: a masterful mystic able to navigate advanced realms of spiritual mastery while presenting himself in a delightfully warm, transparent, brotherly way. He is the best of 21st-century enlightenment: deep thinking, clear-seeing, and radical in his stance.

On this day Thomas will share teachings and guide the group in practices to foster wider consciousness and help participants to learn::

- :: *The secret to your authentic awakening*, and how you can release habitual thinking and behaviors so you can fully participate in the movement of life and “innovate” each moment.
- :: *A new spiritual practice designed uniquely for our fast-paced world* that empowers you to meet challenging and difficult situations in your life with confidence, ease and grace.
- :: How to transform all communication into a spiritual practice and cultivate a conscious relational space to *enjoy deeper, more present connections*.
- :: How to access *levels of consciousness* that go beyond limiting, conventional ego-perceptions and develop subtle energy competency
- :: Enhanced understanding of how to work with individuals and groups in accordance with mystical principles and natural law.

What is the spirit of the age we are in,
and what is the radical awakened state?

– THOMAS HUEBL
